Tri Vu

Atlanta, GA

<https://github.com/trimvu>

<https://tri-vu-dev.netlify.app/>

Full Stack developer and a graduate of Penn State University with a degree in mathematics. Experienced in both front end and back end web development using tools such as JavaScript, Node.js, React, and SQL. Adept in managing projects, debugging, and collaborating with other developers.

PROJECTS

Magic: The Gathering Price Tracker, <https://mtg.herokuapp.com/>

- Solo project built using React, Redux, JavaScript, HTML, CSS, Bootstrap, PostgreSQL, Node.js, Express, and Sequelize
- Using Scryfall's Magic: The Gathering API, users have the ability to register, log in, and sign out of personal accounts, read their accounts, update their username, and delete their accounts. Users can also create, read, update, and delete lists of cards. The users can finally add, read, update the quantity, and delete cards from the lists they created.

Spam Tracking App, <https://github.com/trimvu/capstone>

- Four-person full-stack group project built using React, Redux, JavaScript, HTML, CSS, Bootstrap, PostgreSQL, Node.js, Express, and Sequelize
- Users can create an account and log in with an authentication system, search up a phone number to view if it has been reported as a scam phone number, and report the number themselves

Marvel Project, <https://marvel-trimvu.vercel.app/>

- Solo front-end project built using React, Redux, JavaScript, HTML, CSS, Bootstrap, and SASS
- Using Marvel Comics' API, users can set favorites and search for characters, comics, creators, events, and series. Each page shows all related Marvel content which users can scroll through and click

Band Site, <https://band-site-rhcp.herokuapp.com/>

- A solo project building a fan-band website using JavaScript, HTML, CSS, Node.js, Express, Socket.io, EJS
- Users can view the band's discography, add personal comments to the website, and chat with other users

Blackjack, <https://tri-blackjack.netlify.app/>

- A solo JavaScript-based clone of the popular casino card game, built using Javascript, HTML, and CSS
- Players have the ability to bet before each hand is dealt. Standard Blackjack money distribution is followed with the ability to surrender
